

**1. Product and company Identification**

Product names: Omnipaque®, In concentrations ranging from 140 to 350 mg I/ml  
 Synonyms: Iohexol Injection  
 Application: Diagnostic imaging agent for injection  
 Supplier: GE Healthcare AS, Nycoveien 1-2, P.O. Box 4220 Nydalen, N-0401, OSLO, Norway.  
 Phone Number: +47 23185050. Fax: +47-23186000. [http:// www.gehealthcare.com](http://www.gehealthcare.com)  
 Emergency Phone No: Giftinformasjonssentralen: +47 23185050 (Norway)

**2. Composition/information on ingredients**

Composition:	Main ingredients:	CAS No.:	Content:	Hazard classification
	Iohexol	66108-95-0	30-60 %	None
	Purified water 7732-18-5		40-70 %	None
Primary packaging:	Glass vials and bottles, Polypropylene bottles			

**3. Hazards identification**

Emergency overview: A clear colourless to pale yellow aqueous solution. Presents little hazard if spilled or in case of a fire  
 Potential adverse health effects: Regarded as having very low health hazard. May cause hypersensitivity ("allergy-like") reactions in susceptible people. People with allergies may also have a lower threshold to such stimuli, particularly if recently exposed to agents they are allergic to (e.g. pollen in the pollen season).

**4. First-aid measures**

Skin contact: Wash skin with soap and water.  
 Inhalation: Not applicable  
 Eyes: Flush eyes with water. If persistent irritation occurs, seek medical advice  
 Ingestion: Drink water to dilute the swallowed solution. Seek medical advice if large quantity (more than 1litre) has been consumed.

**5. Fire-fighting measures**

Flammability: Non flammable. Water-based formulation.  
 Decomposition and Explosion Hazards: In a fire this product will decompose and release irritating iodine vapour.

**6. Accidental release measures**

Clean up procedures: Small spills: Clean up with a moist cloth or paper towel. Larger spills: Collect with absorbent material. If appropriate, flush down the drain, using cold water. Contaminated area should be washed with soap and water. Take appropriate precautions when broken glass is present

**7. Handling and storage**

Storage conditions: Store in original container at temperatures below 30° C. Protect from light, sunlight, localised heating sources. Do not freeze.

**8. Exposure controls/personal protection**

Ventilation:	None required.	Protective gloves:	None required.
Eye protection:	None required.	Protective clothing:	None required.

**9. Physical and chemical properties**

Appearance, colour: A clear aqueous solution. Colourless to pale yellow.  
 Odour: None Specific gravity: 1.2 – 1.4 g/ml at 37°C (dependent on concentration)  
 Decomposition temperature: The active ingredient, in a solid form, decomposes at temperatures above 170°C (338°F).  
 Decomposition products: Iodine gas, Carbon dioxide  
 Solubility: Readily soluble in water pH: 6.8 – 7.6

**10. Stability and reactivity**

Stability:	Stable under normal and anticipated storage and handling conditions
Reactivity:	Avoid high temperatures.
Conditions or materials to avoid:	Avoid contact with reactive substances or strong oxidising agents

**11. Toxicological information**

Acute Effects:	The intravenous LD50 of the final dosage form in mice is 46 g/kg, and in rat is 24 g/kg. The oral and intraperitoneal LD50 value of the final dosage form in mice is greater than 39.9 g/kg.		
Local Effects:	Not applicable	Inhalation Effects:	Not applicable
Sensitisation:	Not applicable	Other Effects:	Not teratogenic.

**12. Ecological information**

Environmental Fate:	The preparation is easily soluble in water
Environmental Toxicity:	The active ingredient is rated not toxic to fish, Daphnia, or algae
Biodegradability:	Not readily biodegradable
Bio-accumulation potential:	Not applicable

**13. Disposal consideration**

Clean-up procedure:	Clean up with moist cloth or paper towel. Take care if in a glass bottle
Waste disposal method:	Normal waste route for a regulated waste according to EU Commission Directive 91/689/EC, regulated as it is a pharmaceutical. If incinerated, the incineration facility must be notified that the product contains iodine and that appropriate controls are necessary. Unopened containers can be returned to GE Healthcare for recycling.

**14. Transport information**

Hazard classification:	Non Hazardous for all modes of transport.
Transport conditions:	Shipping container must always be used. The product must never be split down to smaller units than the sales pack. The sales pack must never be used as the only distribution/transportation pack. Containers might be fragile, handle with care. Extra cushioning might be required /necessary. For product integrity: transport between 0-32° C, for up to one week. Protect from light and localised heating sources. The product must not be frozen.

**15. Regulatory information**

Health Hazard Classification:	Not applicable	Fire and Explosion Hazard Classification:	Not applicable
Environmental Hazard Classification:	Not applicable		
R-phrases:	Not applicable	S-phrases:	Not applicable

**16. Other information**

Disclaimer: Although reasonable care has been taken in the preparation of this document. We extend no warranties and make no representations as to the accuracy or completeness of the information contained therein, and assume no responsibility regarding the suitability of this information for the user's intended purposes or for the consequences of its use. Each individual should make a determination as to the suitability of the information for their particular purpose(s).

A safety data sheet is not required for this product under Article 31 of REACH

Status: Omnipaque Version 1.5  
Revision date: December 2014
