

How does your  
**staff training  
and education**  
fit into today's demanding  
work schedules?

Virtual Onsite Training provides a flexible face-to-face training option, to help efficiently build staff competencies for better outcomes.

#### **Innovative training technologies to fit your needs**

GE Healthcare understands the importance and challenges of staff training. Rapidly growing workforces and increased patient loads leave staff with less time to devote to traditional training. Today's health systems need to take advantage of the opportunities that new technologies can offer.

Virtual Onsite Training is an interactive mobile telepresence device which enables healthcare providers timely access to training experts when it fits into their schedules. The mobile system with attached monitor for two-way communication is shipped to your location and can be moved anywhere in your facility. It is an alternative to traditional onsite training and enables efficient and flexible staff training, to help expand clinical confidence and enhance patient care.

#### **Increased staff workloads are not the only challenges for ongoing clinical education. Many providers today face:**

- Increased hospital admissions due to aging populations and healthcare reform
- Time constraints for staff based on increased demands and resource shortages
- New equipment with new functionalities, protocols and procedures to learn
- Continuous changing regulations and compliance requirements

# Technology can help drive efficient and effective on-site training

Virtual Onsite Training telepresence training solutions can offer live, interactive education that can replicate face-to-face interactions, provide training on equipment functionality, and expand access to education resources for healthcare professionals at all levels.

## Virtual Onsite Training can help:

- Schedule training when it is needed including across all shifts
- Replicate standard training as the Virtual Onsite Training moves from department to department where training is needed
- Support your staff with real-time interaction with a team of experts
- Deliver need-based focused training: new system implementation, new hire, refresher, or new procedure
- Improve protocol standardization
- Reduce staff travel expenses
- Facilitate refresher training at a reduced cost

## Connect a GE expert with your staff in your facility

Virtual Onsite Training's innovative training experience allows your staff and the GE Healthcare training expert with the opportunity to interact in real-time and discuss the lesson. You can see the same equipment and the same results. It is like having your own GE expert right at your side. This technology fits into your staff's busy schedule, and helps to provide important training while you focus on the delivering quality care.
